Abstract: **The use of derivatives of theophylline for the preparation of**

medicaments suitable for the treatment of Cystic Fibrosis is described. In particular, the use of 8-cyclopentyl theophylline (CPT) is described for the preparation of medicaments for the treatment of cystic fibrosis. Such medicaments may be administered orally or directly to the lung, for example, in the form of an aerosol.

administration.

4. The use according to Claim 6 wherein the medicament is
15 administered in an amount of 0.001 to 25 mg/kg body weight
per day.

5. The use according to Claim 1 or Claim 2 where medicament is suitable for administering directly lung.

20 6. The use according to Claim 5 wherein the medicament is
a pharmaceutically acceptable aerosol.

Claims

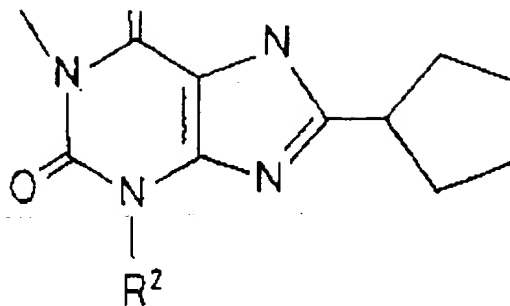

1. The use of a compound of formula (1),

wherein R^1 and R^2 are the same or different and
5 represents an alkyl group having from 1 to 3 carbon
provided that R^1 and R^2 are not both propyl groups,
preparation of a medicament for the treatment of
fibrosis.

2. The use according to Claim 1 of a compound of
10 (1) wherein R^1 and R^2 are both methyl groups.

3. The use according to Claim 1 or Claim 2 where
medicament is suitable for oral or parenteral

wherein R^1 and R^2 are the same or different a
represents an alkyl group having from 1 to 5 carbo

provided R^1 and R^2 are not both propyl groups, together with a pharmaceutically acceptable carrier therefor.

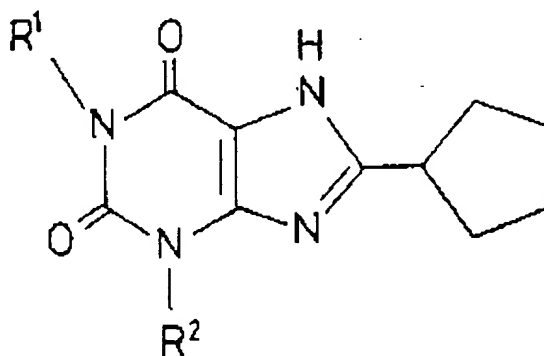

10. The formulation according to Claim 9 which is suitable for oral administration.

5 11. The formulation according to Claim 9 which is suitable for administration direct to the lung.

12. The formulation according to Claim 11 which is in the form of a pharmaceutically acceptable aerosol.

13. The formulation according to Claim 9 which is suitable for parenteral administration.

14. A method of treating cystic fibrosis comprising administering a compound of formula (1)

where R^1 and R^2 are the same or different and each represents an alkyl group having from 1 to 5 carbon atoms provided

15 R^1 and R^2 are the same or different and each represents

13 R and R' are the same or different and each represent
alkyl group having from 1 to 5 carbon atoms provided
and R² are not both propyl groups.

15. The method of claim 14 wherein the compound of
(1) is administered orally.

20 16. The method of claim 14 wherein the compound of
(1) is administered intranasally.

17. The method of claim 14 wherein the compound of
(1) is administered parenterally.
